

Tear-Off Caps (CA)

Tear-off caps are designed for covering external hydraulic threads. As the caps have only one pitch of thread, they can easily be pressed onto an item and tightened with a light twist. The caps can be removed easily: pulling a ring on the side of the cap tears them apart along the fracture lines. In this range some parts are available with vent hole.

Applications:

CA range is recommended for protection of external hydraulic threads.

Main features:

- 

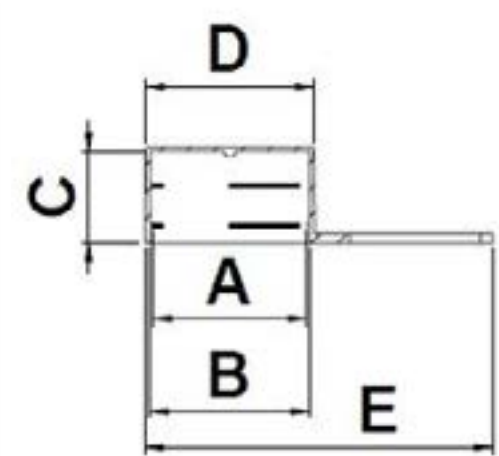

Ideal solution for hydraulic threads
- 

Suitable for Hydraulics segment
- 

Excellent protection thanks to one pitch of thread
- 

Made of RECYCLE LDPE & EVA
- 

Easy mounting & dismounting

Properties

Standard colour: Blue- Other colors may be available upon request
Standard material: RECYCLE LDPE
