

Absoline Components (FA)

Flexible foam plug that serves as a fluid absorber. Plugs protect the inside of components against contamination. The foam releases excess pressure and absorbs leaking fluid. The handle design has got the needed length dot for orientation. Some of them have an additional poka-yoke function that ensures removal of the plug.

Applications:

FA range is recommended for protection of turbochargers & engine block holes.

Main features:

Ideal solution for turbochargers & engine block holes

Suitable for Automotive segment

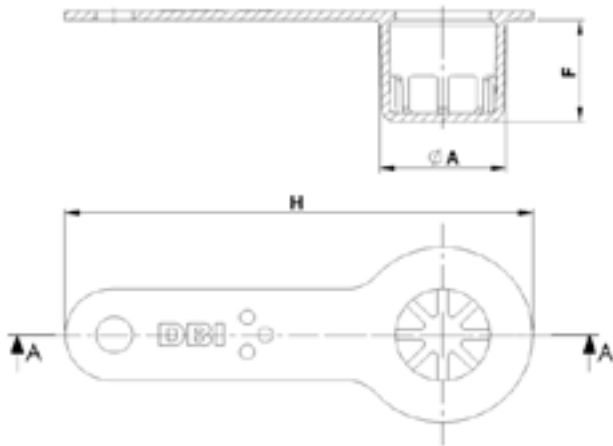

Excellent protection thanks to the foam absorbing the fluid

Made of RECYCLE LDPE & TPE

Easy mounting & dismounting

Properties

Standard colour: Red
Standard material: TPE
